

# iFi nano iDSD connect to Apple: 2 Easy Steps.

## Step 1: Which Apple device do you have?

	Requirement
iPhone (4/4s/5/5c/5s)	iOS7
iPad	Any iOS
iPod Touch	iOS7
iPod Classic	Generation 4 <sup>th</sup> and 5 <sup>th</sup> . Generation 6 <sup>th</sup> (e.g. 160GB) will not work.

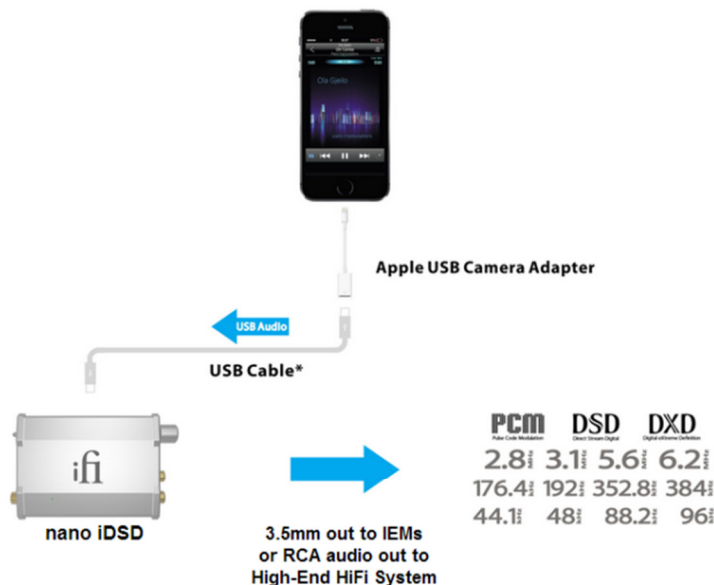

## Step 2: Add USB Camera Adapter.

For lightning connector: <http://store.apple.com/us/product/MD821ZM/A/lightning-to-usb-camera-adapter?node=3a>

For 30 pin connector: <http://store.apple.com/us/product/MC531ZM/A/apple-ipad-camera-connection-kit>

**Done! You can now play music through the iFi nano iDSD from your Apple device.**

## Optional: Play high resolution audio files, DSD files.

As Apple iTunes doesn't support high resolution audio files or DSD files, an additional app is needed: e.g. Onkyo HF Player

(<https://itunes.apple.com/en/app/onkyo-hf-player/id704139896?mt=8>)
